

Tickercamp 10-Level Curriculum Roadmap

A structured path from market foundations to professional trading process. Use this as the study spine for the website.

Learning Sequence

Complete one layer before rushing to the next. Each level should produce vocabulary, examples, practice, and review.

Level	Outcome
0 Foundations	Markets, asset classes, participants, bid, ask, spread, orders, liquidity, volatility, and risk basics.
1 Technical Analysis	Market structure, trends, support and resistance, price action, trendlines, channels, and retests.
2 Auction Theory	Balance, imbalance, acceptance, rejection, price discovery, value, and profile context.
3 Order Flow	Volume, delta, cumulative delta, footprints, absorption, exhaustion, DOM, and liquidity.
4 ICT and SMC	Liquidity, BOS, CHoCH, FVG, order blocks, premium and discount, and session models.
5-9 Professional	Elliott Wave, Fibonacci, quant, backtesting, risk, psychology, portfolio theory, performance analytics, and process.

Weekly Study Loop

Read one lesson, complete one visual explainer, do one drill, score one quiz, print one worksheet, and write one journal review.
